Art Unit: 1649

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 19, 21, 25 and 26, drawn to a receptor binding assay, classified in class 436, subclass 501.
- II. Claim 20, drawn to an agonistic compound of unspecified constitution, classification undeterminable.
- III. Claim 22, drawn to an antagonistic compound of unspecified constitution, classification undeterminable.

The inventions are distinct, each from the other because of the following reasons:

The polypeptide that defines the method of invention I, the agonistic compound of invention II and the antagonistic compound of invention III are chemically different chemical compounds each of which can be made and used without the others. They do not reflect a single inventive concept because they lack a common feature or combination of features that distinguish these three compounds as a group from compounds of the prior art.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1649

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
